

# Empowering the Future of **Higher Education**

---

AI-LED, DATA-DRIVEN, DIGITAL TRANSFORMATION FOR UNIVERSITIES

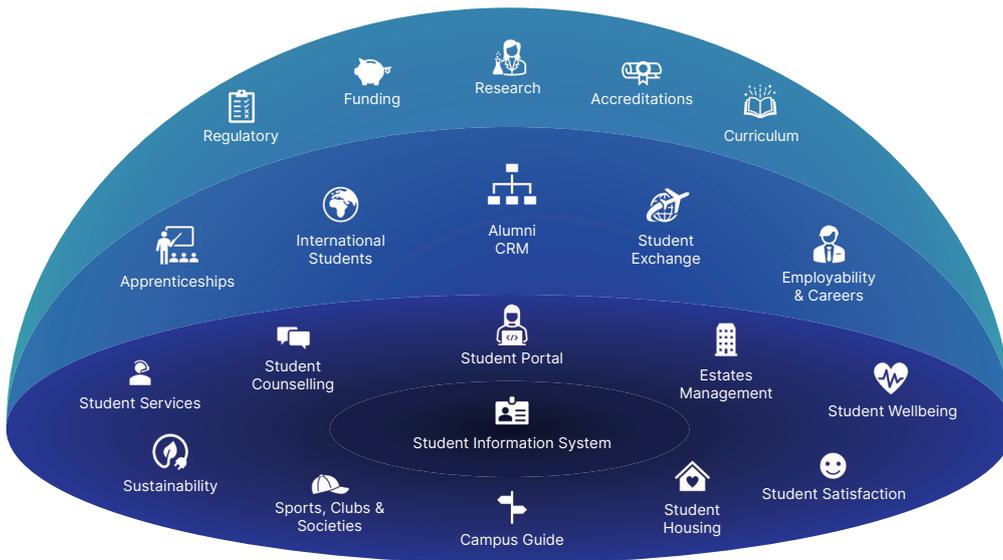

The higher education landscape is evolving at an **unprecedented pace.**

**As universities and colleges strive to meet the ever-growing demands of students, faculty, and staff, they are confronted with a myriad of challenges.** Cyferd empowers higher education institutions to accelerate digital transformation through a data-driven approach and the powerful AI capabilities of our platform.

# Empower your Institution

Cyferd Solutions for HE

**Powered by AI and Data**

Our platform provides a comprehensive value map, targeting crucial facets of Higher Education institutions. We empower you to:

**Optimise** strategy and planning, enhancing financial governance, market planning, and executive strategies for sustainable growth.

**Streamline** funding, business, and commerce operations while bolstering your brand reputation, student engagement, and employability.

**Ensure** seamless regulatory compliance and gain robust data insights to optimise HR, facilities, and back-office operations.

**Elevate** the student experience, support academic excellence, and drive agile change and transformation across your institution.

## 70% Less Customisation:

Reduce the need for extensive customisation of core backend systems, saving time and resources.

## 80% Faster Prototyping:

Accelerate the development and release of new applications, enabling quick adaptation to changing needs.

## 33% IT Cost Reduction:

Cut IT operating costs significantly, freeing up resources for strategic initiatives.

## 25% Efficiency Improvement:

Enhance operational efficiency across the institution, from student services to financial governance.

# Cyferd is not just a platform

It's a transformative solution designed to address the unique challenges faced by higher education institutions:

**Data Fragmentation:** In today's higher education institutions, data is often trapped in silos. Cyferd can liberate your data and maximise its value through our distinctive data approach.

**Core Systems:** Many institutions have invested heavily in specialist systems but vendors can be slow to adapt to rapidly changing needs. Cyferd adds agility through modern inter-operability, to extend and enhance capabilities with ease.

**Reduce Customisation:** Customising 'one-size-fits-all' systems is often expensive, time-consuming and impedes cloud adoption. Cyferd resolves these issues to accelerate upgrades and cloud migration.

**Software Overload:** The proliferation of many vendor applications has led to complexity and cost inefficiencies. Cyferd's vision is to create a unified ecosystem, streamlining operations and significantly reducing costs.

## Our solution uses AI to deliver innovation and drive value for Higher Education

By enabling quick prototyping, agile development, and user-driven customisation, we significantly reduce deployment timelines.

**Data Integration:** Seamlessly connect disparate systems to unlock the power of your data, enabling informed decision-making and improved efficiency.

**Cost Savings:** Embrace a Cyferd ecosystem to streamline operations and significantly reduce software and maintenance costs.

**Modernisation:** Transition from legacy systems to a connected ecosystem that drives accuracy and efficiency while meeting the evolving needs of your business.

**Cloud Strategy:** Whether it's harnessing customisations or exploring cost-effective replacements, Cyferd helps you chart a strategic path to the cloud.

# Neural Genesis™ AI: Accelerates Digital Transformation by up to 10x

Cyferd empowers higher education institutions to innovate rapidly with the power of our Neural Genesis AI capabilities to accelerate digital transformation.

Self-writing, self-correcting software that continually evolves and improves as it absorbs larger and richer datasets.

## NGGenerate

Generative AI that creates operational applications in minutes

## NGAssimilate

AI migration of legacy databases into the Cyferd platform in minutes

## NGSearch

AI Search - Ask any question across all of your data

## NGAnalyse

Seek advice from your AI asking questions from your data

## NGPredict

Predict outcomes, identify clusters and detect outliers in your data

## **Are you ready to reshape the future of higher education?**

Join us on the journey to break down data silos, reduce costs, modernise systems, and foster innovation. Contact us today to learn how Cyferd can help your institution thrive in the ever-evolving higher education landscape.

**Together, we can build a brighter future for higher education.**
